

Avoca

Voice control for the digital era

To play it,  just say it.

The Avoca VIP Music Edition™ – System Highlights

The VIP Music Edition is a music control system for your living room, with a magical difference: it turns your CD and MP3 collections into one digital library with our unique Say it–Play it™ control interface. Touch the Avoca Music Companion™ or talk to it – this is the fastest, most entertaining way to find and play your music.

System Components and Features

The VIP Music Edition includes an Avoca **Music Companion (MC™)**, a wireless handheld device with a unique touch & talk user interface, and the Avoca **Music Player**, which plays your CDs and MP3s, stores a copy in lossless digital format, and simply plugs into your stereo via standard analog or digital cable connections.

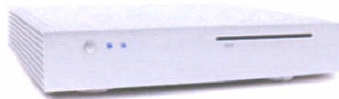

Users get flexible control of their music collections, including:

- **The Music Companion wireless controller – more mobile, more convenient, more fun:** The large-screen Avoca MC controller provides a portable browsing list of your music library, by genre, artist, album or track. By touch or by voice, using Say it–Play it, you get the most out of your music investment – from anywhere around your home – without a direct line of sight to your Avoca Music Player, and without depending on the TV to see your music list. The MC gives users the freedom to roam and relax. Let the music play!
- **The Music Player – play your CDs, put them away – no more CD hassles!** Just play your CD music in the Avoca VIP Music Player. A copy is loaded into the disk storage, building your digital library. No more frustration finding that CD – then enjoy your CDs in the car, at the cottage or while traveling!
- **Say it–Play it user interface for music:** Know what music you want? Just ask! Say simple, intuitive voice commands – like “Play the Eagles,” “Play the Boss,” “Set volume to 8,” “Display by artist,” “Queue Yesterday” – to browse and enjoy your music collection. Voice control is fast, convenient and fun, bypassing menu trees and avoiding the delays of traditional interfaces. Attach a personal nickname or shorter name to a music item, making it more convenient to select, or just to personalize your system. Create User-friendly Playlists for the whole family.
- **iPod connectivity:** just plug in guest’s iPods for more music fun!
- **All Music Guide (AMG):** automatically access the leader in music metadata.
- **Avoca MCP™ technology:** provides fast, voice-enabled media search and control abilities, using speaker-independent recognition technology, proven in millions of devices.

A unique gift for a special person? A great idea for a loved one, or for yourself! Imagine the fun you can have with your music collection. Multiple users, friends and family can all enjoy the Avoca VIP Music Edition, by touch or by simple English commands – no system training is required. Avoca users say the VIP system is now one of their favorite entertainment products! Just call us for a demonstration.
